**To Whom It May Concern**

This is to recognize that PTA awarded a "Local Number Portability" consultancy to "Voice Tel Tech" in year 2007. The objective of the activity was to develop an understanding of introduction of Local Number Portability (LNP) as a recommendation to policy makers in forming the next policy.

The scope of work was to advice and assist PTA in understanding the implications of implementation of LNP by Fixed Line Operators, extent of its use, benefits/draw backs, methodology of implementation and its impact on Fixed Line Operators' business.

VTT completed the job professionally and successfully. Voice Tel Tech's services for strategy and management consulting were of the high professional caliber. I thank VTT for the services they have rendered and certainly look forward to a long-lasting continued working relationship.

I wish VTT all the success that they deserve.

  
Sajjad Latif Awan 21/7/09
